

Grentia

GRENTIA®

Ingredient Systems for Modern Supplement Manufacturing

Co-Processed Excipients · Active Granulation · Botanical Extracts

Product Catalogue 2026

COMPANY OVERVIEW

Grentia at a Glance

Grentia is a specialist supplier of functional ingredient systems for supplement manufacturers. We develop co-processed excipients, granulated actives, and botanical extract formats engineered for performance in tablet and capsule production.

Functional Ingredients

Co-processed excipients, active granules, and botanical extracts

B2B Supply Focus

Direct supply to supplement manufacturers, CMOs, and formulators

Full Documentation

TDS, MSDS/SDS, CoA, and source documents as standard

- Formulation-ready ingredient systems
- Consistent batch-to-batch quality
- Technical and regulatory documentation support
- Scalable supply for commercial production

PORTFOLIO STRUCTURE

Three Focused Ingredient Platforms

Grentia's catalogue is organized around three distinct platforms, each addressing specific formulation and manufacturing needs.

Co-Processed Excipients

Binder-filler systems engineered for direct compression and capsule filling. Available across four compositional sub-platforms.

Active Granulation

Granulated actives optimized for flowability, compressibility, and dosing accuracy. Designed for tablet and capsule formats.

Botanical Extracts

Powder and liquid extract formats for supplement applications. Characterized for stability and formulation compatibility.

Each platform is supported by full technical documentation and direct formulation support.

SECTION 01

Co-Processed Excipients

Two product lines. Four base options. One unified platform.

PRODUCT LINES

Presstose Ultra
Binder + Filler co-processed system

Presstose
Regular
Filler-only system

AVAILABLE IN

- Calcium-Based
- Lactose-Based
- Botanical-Based
- Clean Label Solutions

Presstose Ultra

High-Performance Binder+Filler Co-Processed System

Presstose Ultra is Grentia's premium co-processed excipient line, engineered to function as both binder and filler in a single system. Designed for direct compression and capsule filling with superior flow and compressibility.

Superior Flowability

Optimized particle morphology for consistent die fill and capsule dosing

High Compressibility

Excellent tablet hardness at low compression force

Binder + Filler in One

Eliminates the need for separate binder addition

Broad Compatibility

Compatible with a wide range of actives and processing conditions

High Whiteness Appearance

Bright white visual profile meeting the aesthetic standards of premium supplement formats

Clean Technical Visual Profile

Uniform particle appearance and neutral colour for professional finished-product presentation

CO-PROCESSED EXCIPIENTS

Presstose Regular

Reliable Filler Platform for Tablets and Capsules

Presstose Regular is Grentia's standard co-processed excipient range, providing reliable filler performance across tablet and capsule applications. A cost-effective, consistent platform for high-volume supplement manufacturing.

Consistent Bulk Density

Reliable flow and fill weight consistency across production runs

Tablet & Capsule Ready

Suitable for direct compression and capsule filling operations

Cost-Effective Platform

Optimized for high-volume commercial manufacturing

Four Sub-Plat forms

Available across Calcium-Based, Lactose-Based, Botanical-Based, and Clean Label sub-platforms

CO-PROCESSED EXCIPIENTS

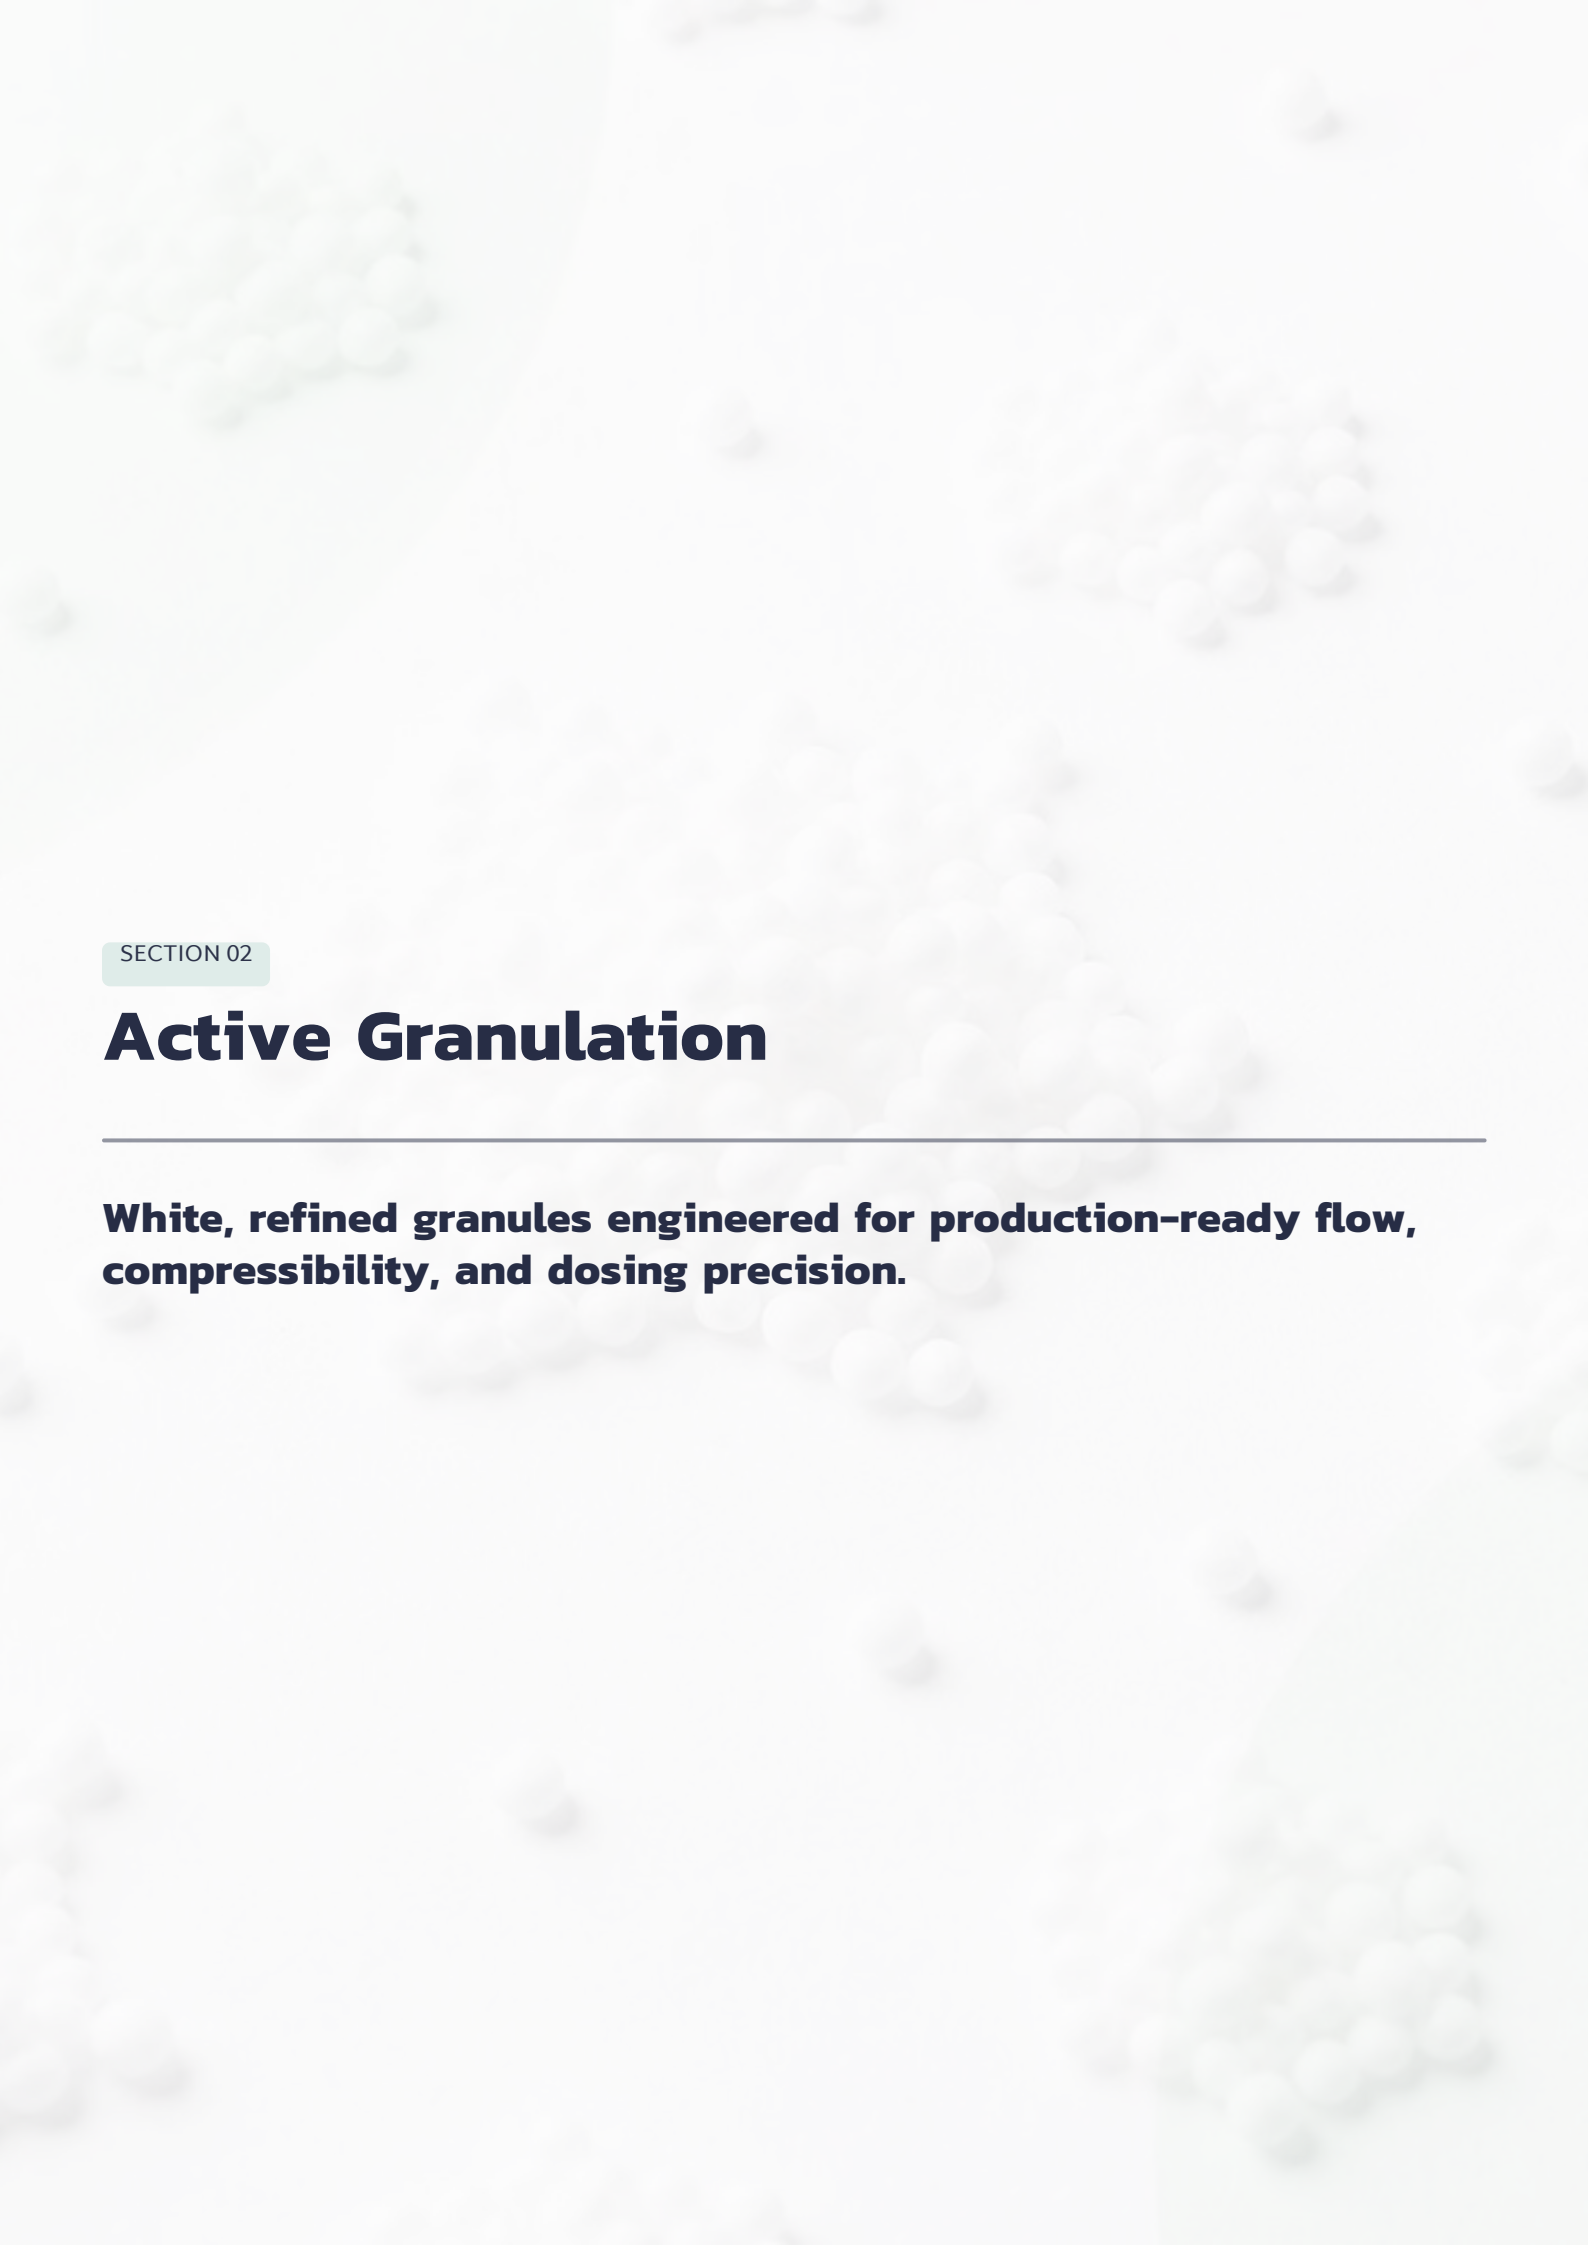

Platform Variants

Four Sub-Platforms Across Presstose Ultra and Presstose Regular

Both Presstose Ultra and Presstose Regular are available across four compositional sub-platforms to match specific formulation and regulatory requirements.

Calcium-Based Calcium carbonate or calcium phosphate carrier systems for mineral-active co-processing	Lactose-Based Classic dairy-derived filler platform for conventional tablet and capsule formulations
Botanical-Based Plant-derived carrier systems for clean-label and botanical-positioned products	Clean Label Solutions Excipient systems formulated without synthetic additives for clean-label supplement positioning

 Sub-platform selection is guided by active ingredient compatibility, regulatory requirements, and target dosage form. Technical guidance available on request.

SECTION 02

Active Granulation

White, refined granules engineered for production-ready flow, compressibility, and dosing precision.

Active Granule Categories

FourIngredientGroups.White,Refined,Production-Ready.

Vitamin Granules

Granulated vitamin actives for precise dosing. Includes **Vitamin C** and a broad range of water- and fat-soluble vitamins.

Mineral Granules

Granulated mineral forms for tablets and capsules. Includes **Magnesium Oxide, Magnesium Bisglycinate, Magnesium Citrate, Magnesium Malate, Magnesium Fumarate, and Calcium Carbonate.**

Specialty Active Granules

High-value actives in granulated format for consistent blend performance. Includes Glucosamine and other specialty compounds.

Botanical Active Granules

Standardised herbal extracts in granulated format for improved flowability and blend uniformity.

- ❏ All active granules are white or off-white refined technical granules, manufactured to pharmaceutical-grade standards.

The background of the entire page is a soft-focus photograph. In the upper right, two glass vials with white caps are visible; the left one contains a pale green liquid, and the right one contains a pale yellow liquid. In the lower left, a pile of fine, light green powder is shown. To the left of the powder, some dried botanical material, possibly a branch with leaves, is partially visible. The overall lighting is bright and even, creating a clean, scientific aesthetic.

SECTION 03

Botanical Extracts

Two formats. One application-ready extract platform for tablets, capsules, and liquid systems.

POWDER EXTRACTS

LIQUID EXTRACTS

Powder Extracts

For Tablets, Capsules, and Water-Soluble Applications

Grentia powder botanical extracts are produced and characterized for use in tablet, capsule, and water-soluble supplement formats. Each extract is standardized for active marker content and tested for solubility, particle size, and stability.

Standardized Actives

Consistent marker compound levels across batches

Tablet & Capsule Ready

Optimized particle size and flow for direct compression and filling

100% Water Soluble

Engineered for full dissolution in water-based supplement applications

Full Traceability

Origin documentation and botanical identity confirmation as standard

BOTANICAL EXTRACTS

Liquid Extracts

Long Shelf Life · Broad Formulation Compatibility

Grentia liquid botanical extracts are formulated for use in supplement manufacturing systems where a liquid active is required. Characterized for stability, concentration, and compatibility with both oil-based and water-based formulation matrices.

Oil & Water Compatible

Available in oil-soluble and water-soluble liquid formats

Extended Shelf Life

Formulated and packaged for stability over commercial supply timelines

Defined Concentration

Each extract characterized by active content per unit volume

Soft Gel & Liquid Dose Ready

Suitable for soft gel encapsulation and liquid supplement formats

Quality & Documentation

Complete Documentation as Standard. Technical Support Throughout.

Grentia operates as a professional supply partner, not solely as a product vendor. Every ingredient in the portfolio is supported by a complete documentation package, provided as standard with no additional request process required.

Standard Documentation Package

TDS

Technical Data Sheet: full product specification, physical and chemical parameters, application guidance

MSDS / SDS

Safety, handling, storage, and regulatory classification information

CoA

Certificate of Analysis: batch-specific analytical results confirming specification compliance

Source

Documents
Origin declarations, allergen statements, and regulatory support documents

Technical Support

Available throughout ingredient evaluation, formulation development, and scale-up.

- Product selection for specific dosage form requirements
- Formulation compatibility assessment
- Technical data interpretation and application advice
- Regulatory documentation support
- Ongoing supply documentation management

- ☐ All documentation is provided as standard — TDS, MSDS/SDS, and CoA are included as part of Grentia's baseline supply commitment.

GET IN TOUCH

Speak to the Grentia Team

Grentia works directly with formulation teams, procurement specialists, and business development managers across the supplement manufacturing industry. We welcome direct contact for ingredient evaluation, sample requests, and supplier qualification.

How to Inquire

- Product inquiries and technical documentation requests
- Sample requests for qualified manufacturers
- New supplier qualification and documentation packages
- Formulation support and ingredient evaluation

Request a Sample

Samples available for qualified manufacturers. Submit via email with intended application and dosage form.

Herbal Extract Master List

Product Name (EN)	Botanical / Latin Name	INCI Name	CAS No	EINECS No
Acerola Fruit Extract	Malpighia emarginata	Malpighia Emarginata Fruit Extract	—	—
Sage Leaf Extract	Salvia officinalis	Salvia Officinalis Leaf Extract	84082-79-1	282-025-9
Hawthorn Flower Extract	Crataegus monogyna	Crataegus Monogyna Flower Extract	—	—
Hawthorn Fruit Extract	Crataegus monogyna	Crataegus Monogyna Fruit Extract	84603-61-2	283-262-0
Immortelle Flower Extract	Helichrysum italicum	Helichrysum Italicum Flower Extract	90045-76-4	289-833-1
Goldenrod Extract	Solidago virgaurea	Solidago Virgaurea Extract	85117-06-2	283-649-4
Pineapple Fruit Extract	Ananas comosus	Ananas Sativus Fruit Extract	—	—
Inula Extract	Inula viscosa	Inula Viscosa Extract	—	—
Aronia Fruit Extract	Aronia melanocarpa	Aronia Melanocarpa Fruit Extract	84603-91-8	—
Barley Grass Extract	Hordeum vulgare	Hordeum Vulgare Extract	—	—
Lady's Mantle Extract	Alchemilla vulgaris	Alchemilla Vulgaris Extract	84695-94-3	283-614-3
Lion's Mane Mushroom Extract	Hericium erinaceus	Hericium Erinaceus Extract	—	—
Safflower Extract	Carthamus tinctorius	Carthamus Tinctorius Extract	8001-23-8	232-276-5
Horse Chestnut Extract	Aesculus hippocastanum	Aesculus Hippocastanum Extract	8053-39-2	283-294-5
Horsetail Extract	Equisetum arvense	Equisetum Arvense Extract	71011-23-9	275-123-8
Avocado Fruit Extract	Persea gratissima	Persea Gratissima Fruit Extract	8024-32-6	232-428-0
Avocado Leaf Extract	Persea gratissima	Persea Gratissima Leaf Extract	—	—

Product Name (EN)	Botanical / Latin Name	INCI Name	CAS No	EINECS No
Bearberry Extract	Arctostaphylos uva-ursi	Arctostaphylos Uva-Ursi Leaf Extract	—	—
Calendula Flower Extract	Calendula officinalis	Calendula Officinalis Flower Extract	84776-23-8	282-667-8
Pumpkin Fruit Extract	Cucurbita pepo	Cucurbita Pepo Fruit Extract	—	—
Maidenhair Fern Extract	Adiantum capillus-veneris	Adiantum Capillus-Veneris Extract	—	—
Bamboo Extract	Bambusa vulgaris	Bambusa Vulgaris Extract	—	—
Okra Seed Extract	Abelmoschus esculentus	Abelmoschus Esculentus Seed Extract	—	—
Frangula Bark Extract	Rhamnus frangula	Rhamnus Frangula Bark Extract	84625-28-5	283-269-5
Karamuk	Berberis Vulgaris / Coptis chinensis	Berberis Vulgaris	—	—
Bergamot Extract	Citrus bergamia	Citrus Aurantium Bergamia Fruit Extract	—	—
